

Chapter 105: DIRECTORY

Chapter Syllabus (Topics Covered)

- Directory of 20th Century Psychologists
- Theoretical Foundations of Psychology
- Structuralism and Behaviorism
- Experimental Psychology
- Influential Psychologists
- Key Researchers in the Field
- Development of Psychology as a Science
- Directory of Researchers

Important Topics to Master

- **Psychology's Developmental History**
 - *Why this topic is important: The history of psychology is essential to understand how psychology evolved and how various theories and approaches were developed. It provides a foundation for the understanding of the current state of psychology.*
 - *Important concepts to understand:*
 - *Structuralism and Behaviorism: Two fundamental approaches in psychology, aiming to understand human behavior and subjective experiences.*
 - *Experimental Psychology: The study of mental processes through experimentation.*
 - *Influential Psychologists: The contribute to the field of psychology, including key researchers and their contributions.*

Career-Oriented Topics

- Directory of 20th Century Psychologists
- Theoretical Foundations of Psychology
- Experimental Psychology

Chapter Summary

The Directory of 20th Century Psychologists provides an extensive list of influential psychologists who contributed to the development of psychology as a science. This chapter highlights the important contributions

of various researchers and the development of psychology as a distinct area of study. The directory covers structuralism and behaviorism, experimental psychology, influential psychologists, and key researchers in the field.

Key Takeaways

- **Important Definitions:**

- *Experimental psychology: The study of mental processes through experimentation.*
- *Structuralism: The study of the elements or components of mental processes.*
- *Behaviorism: The study of observable behavior.*

- **Important Formulas/Syntax:** N/A

- **Important Concepts:**

- *The history of psychology is necessary to understand the current state of psychology.*
- *Structuralism and behaviorism are fundamental approaches in psychology.*
- *Experimental psychology is a method of study in psychology.*

- **Frequently Asked Interview Topics:**

- *What are the main approaches in psychology?*
- *How did psychology evolve?*
- *Who are some influential researchers in the field?*

- **Exam-Focused Points:**

- *The history and development of psychology*
- *Structuralism and behaviorism*
- *Experimental psychology*

Teaching Plan (Instructor Guide)

Day 1-2: Introduction and History of Psychology

- **Learning Objectives:**

- *Students will be able to explain the history and development of psychology.*
- *Students will be aware of the major approaches in psychology and the key researchers contributing to the field.*

- **Teaching Methods & Strategies:**

- *Analogical explanations to help students understand the historical context of psychology.*
- *Hands-on demos to illustrate the major approaches and their connections to the field.*

- **Classroom Activities & Discussion Prompts:**

- *Class discussion on the history of psychology and its major contributors.*

- *Case studies of influential researchers and their contributions to the field.*
- Check-on-Learning Questions:
 - *What are the main approaches in psychology?*
 - *Who are some influential researchers in the field?*

Day 3-4: Experimental Psychology and Structuralism vs. Behaviorism

- Learning Objectives:
 - *Students will be able to explain the fundamentals of experimental psychology and the importance of its role in psychology.*
 - *Students will be aware of the fundamental differences between structuralism and behaviorism.*
- Teaching Methods & Strategies:
 - *Hands-on demos to illustrate the role of experimentation in psychology.*
 - *Analogical explanations to help students understand the differences between structuralism and behaviorism.*
- Classroom Activities & Discussion Prompts:
 - *Case studies of key researchers and their experiments in psychology.*
 - *Class discussion on the major differences between structuralism and behaviorism.*
- Check-on-Learning Questions:
 - *How does experimental psychology contribute to the field of psychology?*
 - *What are the main differences between structuralism and behaviorism?*

Day 5-6: Review, Practice, and Exam Preparation

- Learning Objectives:
 - *Students will review the chapter's key concepts and major contributors to the field of psychology.*
 - *Students will demonstrate their understanding of the historical context of psychology and the role of experimentation in the field.*
- Teaching Methods & Strategies:
 - *Group discussions on the major points of the chapter.*
 - *Practive quizzes to assess students' progress.*
- Classroom Activities & Discussion Prompts:
 - *Case studies of the directory of 20th-century psychologists.*
 - *Class discussion on key concepts and the contributions of influential researchers.*
- Check-on-Learning Questions:
 - *What are the main topics of the chapter?*
 - *Who are the major contributors to the field of psychology?*
